

Recent Austin Coding Academy graduate offering a strong foundation in software engineering and programming principles. Experienced in object-oriented programming; developing, testing and debugging code; designing interfaces; and administering systems and networks. Ability to quickly learn and master new technologies. Successful working in both team and self-directed settings.

Projects

- Online portfolio and marketplace for my personal art business.
<https://ms-studio.herokuapp.com>
- MERN-stack movie database. Users can add movie title, director, genre and year of production to database. Additionally, users can delete items from database.
<https://github.com/MTSnowden/mern-movie-database>
- CRUD To-Do application. Users can create new to-do item, read a list of saved items, update status of item and delete the item once completed.
